

# **Nebraska State Fire Marshal Training Division**

## **Certification Policy and Procedures – Fire Fighter II**

Date: May 8, 2007

### **Fire Fighter II Written Examination Description**

The Fire Fighter II written examination shall consist of two exams; one addressing knowledge specific questions to the FFII firefighting level as listed in NFPA 1001, 2002 Edition, and one addressing knowledge specific questions to the Operations Level as listed in NFPA 472, 2002 Edition. Both examinations shall be administered at the same time at one Test Site, noted on the Training Division website for certification testing.

#### **FFII Competency Specific Examination-**

The FFII competency specific examination shall consist of 75 written questions and is administered independently from the FFII hazmat competency specific examination on Operations Level.

To successfully pass this examination, the candidate must have a score equal to or greater than 75%.

No retests of this examination will be permitted onsite, and a minimum of 30 days must lapse before a second examination can be administered.

#### **FFII – Hazmat Operations Level Competency Specific Examination-**

The FFII – Hazmat Operations Level competency specific examination shall consist of 25 written questions and is administered independently from the FFII competency specific examination on firefighting.

To successfully pass this examination, the candidate must have a score equal to or greater than 75%.

No retests of this examination will be permitted onsite, and a minimum of 30 days must lapse before a second examination can be administered.

#### **Unsuccessful Completion-**

Should any candidate be unsuccessful with either of the two examinations, the examination with less than an acceptable score will not weigh against the successful completion of the other examination. The successful score will be entered into the candidate's records in the database and shall remain secure until the candidate successfully completes the Fire Fighter II Written Examination requirements for Fire Fighter II certification. At that time, the certification certificate will be awarded.
